NFT STAKING

Emperor Nft staking is a separate smart contract that holds some amount of Emperor coin. It can only allow emperor nft holders to stake their nfts and earn staking reward. There is also no limit to the number of nft a single wallet can stake, the reward will be doubled with the number of nfts staked.

Just like the coin staking, the rewards for nft staking are also generated on every hour and stakers can decide to claim them at any time.

When staking, it is recommended for nft stakers to keep record of the token Id of every nft they staked. The token Ids is the only way the smart contract recognizes stakers to their staked nft. The smart contract will request for the token Id before allowing a staker to withdraw staked nfts.

The reward generated on every hour for a single nft staking is 0.0145 emperor coin which will make up to 0.348 coin in every 24 hours. The staked Nfts can be withdrawn at any willing time but with the exact same wallet used when making a stake and exact token Ids entitled to the wallet.

NFT 质押

皇帝 Nft 质押是一个单独的持有一定数量的皇帝代币的智能合约。它仅仅允许皇帝 nft 的持有者将他们的皇帝 nft 进行质押并获得质押奖励。单个钱包质押的皇帝 nft 数量没有限制，奖励将随着质押数量的增加而成倍增加。

如同代币质押一样，nft 质押的奖励也是每小时产生一次，质押者可以随时提取收益。

进行质押时，建议 nft 质押者记录质押的每一个 nft 的代币 ID。代币 ID 是智能合约识别质押者的唯一方式。质押者撤回质押的 nft，智能合约需要请求代币 ID。

单个皇帝 NFT 每小时产生的奖励为 0.0145 枚皇帝币，每 24 小时可获得 0.348 枚皇帝币。质押的 Nfts 可以随时取出，但需要使用与质押时相同的钱包操作，钱包中的代币 ID 也完全相同。

STEPS TO STAKE EMPEROR NFT

To stake Emperor Nft, you need to first open your metamask browser for mobile users and visit our official website <https://emperorsclub.netlify.app>. And must hold at least 1 Emperor nft to stake including gas fee. Then follow the steps below.

Step 1

Once you are on the website, click on the connect button and accept the connection.

Step 2

After connecting to the Dapp, you will first need to approve the contract to transfer your Nfts.

Step 3

Then confirm the approval. This will now give the staking smart contract the permission to transfer your nfts.

Step 4

After confirming the approval, you will now need to key in the token ID of your nft you want to stake.

Step 5

Then click the stake button and confirm the transaction. The smart contract will now transfer and lock your nft. You're now eligible to claim rewards as long as the nft is locked.

Remember, to unstake your nft you need to follow the same steps from 1 to 4 and then click the unstake button to withdraw back your nft.

皇帝NFT的质押步骤

要质押皇帝Nft，你需要先使用手机打开你的小狐狸钱包浏览器，输入官网：<https://emperorsclub.netlify.app>。账户必须持有至少1个皇帝NFT进行质押，账户需要保留燃料费。

按照以下步骤操作：

步骤1-点击(CONNECT)

登录网站后，单击连接按钮并接受连接。

步骤2-点击(APPROVE)

连接到Dapp后，您需要首先需要授权智能合约转移您的皇帝NFT。

步骤3-点击(Confirm)

然后确认批准。这将允许质押智能合约转移您的皇帝NFT。

步骤4-输入(NFT编号)

确认批准后，需要输入您要质押的皇帝NFT的ID。

步骤5-点击(STAKE)

然后单击质押按钮并确认交易。智能合约将转移并锁定您的nft。只要nft被锁定就有资格领取奖励。

请记住，要取消质押nft，您需要遵循从1到4的相同步骤，然后单击取消质押按钮(UNSTAKE)收回您的nft。

COIN STAKING

Emperor coin staking mechanism is been implemented in the main Emperor coin smart contract. The staking mechanism allows holders with up to 10,000 emperor coins to stake and earn staking rewards, which can be claimed at any willing time. This can be away to reduce volatility in the coin and stakers are paid for their effort with staking reward.

Any one can join the stake once they meet up with the required staking deposit which is 10,000 emperor coins. There is no limit to the number of stakes a single wallet can make, the reward will be doubled with the number of stakes a wallet made. Rewards are generated on every hour starting from the time of deposit and as takers can decide to claim them on every hour or still leave them for some time

The reward generated every hour for each staker on a single stake is 0.3 emperor coin which will make up to 7.2 coins in every 24hours. The more deposit staked, the more the reward generated. The deposited stake can be withdrawn at any willing time but with the exact same wallet used when making the stake.

皇帝币质押

皇帝币主智能合约中实施了皇帝币的质押机制。质押机制允许持有达到10000枚皇帝币的持有人质押并获得质押奖励，可以随时领取质押奖励。

这样可以减少皇帝币的波动性，同时质押者的努力得到回报。

任何人只要达到所需的1万枚皇帝币的要求，就可以进行质押。单个钱包可以质押的数量没有限制，奖励将随着钱包质押的数量增加而增加。从质押开始，每小时都会产生质押奖励，质押者可以决定每小时领取奖励，或者在一段时间内保留奖励

10000币质押每小时产生的奖励是0.3枚皇帝币，每24小时可获得7.2枚皇帝币。质押的越多，产生的回报就越多。质押的皇帝币可以在任何时间取回，但使用的钱包应与质押时使用的钱包完全相同。

STEPS TO STAKE 10,000 EMPEROR COINS

To run an Emperor coin staking, stakers must hold at least 10,000 emperor coins. Then open metamask browser for mobile users and visit emperor coin staking Dapp <https://emperorsclub-coinstake.netlify.app>. Next is to follow the steps below.

Step 1

Once you are on the coin staking Dapp, click on the connect button and accept the connection.

Step 2

After connecting to the Dapp, just click on the stake button and confirm the transaction. The smart contract will automatically withdraw and lock up 10,000 emperor coins from your wallet. Now the wallet is eligible to claim rewards from the smart contract as long as the 10,000 coins are still locked.

Step 3

To withdraw back your staked tokens, after connecting to the Dapp click on the unstake button and the 10,000 locked tokens will be transferred back to your wallet.

质押10000枚皇帝硬币的步骤

若要进行皇帝硬币质押，质押者必须持有至少10000枚皇帝硬币。使用手机打开小狐狸钱包浏览器，并输入皇帝币质押Dapp:

<https://emperorsclub-coinstake.netlify.app>

按照以下步骤操作：

步骤1-点击(CONNECT)

打开代币质押Dapp网址，点击连接按钮并接受连接。

步骤2-点击(STAKE)

连接到Dapp后，只需单击质押按钮并确认交易。智能合约将自动从确认钱包提取并锁定10000枚皇帝币。只要10000枚硬币仍被锁定，钱包就有资格从智能合约中获得奖励。

步骤3-点击(UNSTAKE)

要取回您质押的代币，请在连接到Dapp后单击“取消质押”按钮，10000个锁定的代币将被转移回您的钱包。

CONNECT

STEP: 1

POOL STAKING

To make Emperor ecosystem strong and profitable to everyone, we have also implemented a pool staking

Pool staking is a separate smart contract that also holds some amount of emperor coin which will be deducted from the 30 million genesis mint. Emperor coin holders with lesser coin holdings can now stake and earn staking reward.

The reward for pool staking is generated on every hour and can be claimed at anytime. The bigger the amount staked, the bigger the reward generated. Staked deposit can also be withdrawn at any willing time but with the exact same wallet address used to make the stake.

NB: Please always claim the available rewards before withdrawing staked deposits.

质押池

为了使帝皇生态系统更强大，并为每个人带来利润，我们还实施了质押池

质押池是一个单独的智能合约，在智能合约中持有一定数量的皇帝币，这些皇帝币将从 3000 万创世铸币中扣除。少量皇帝币持有者现在可以进行质押并获得质押奖励。

质押奖励每小时产生一次，可随时领取。质押金额越大，所产生的回报就越大。质押的皇帝币可以在任何时间取回，但使用的钱包应与质押时使用的钱包完全相同。

注意：在解除质押之前，请务必领取可用的奖励。

STEPS TO JOIN EMPEROR POOL STAKING

Pool stakers can stake a minimum of 1 emperor token. To join the pool, on your metamask browser visit <https://emperorsclub-poolstake.netlify.app> then follow the steps below.

Step 1

Once you are on the coin staking Dapp, click on the connect button and accept the connection.

Step 2

After connecting to the Dapp, you will first need to approve the contract to transfer your tokens.

Step 3

Next is to put the amount of emperor token you would like to stake.

Step 4

After putting the amount of token, now click the stake button and the amount will be withdrawn from your wallet to the smart contract. Now you are eligible to claim rewards as long as the tokens are still locked up. You can still increase the amount of staked tokens at anytime at the same time increase the rate of reward you claim.

To withdraw back staked tokens, after connecting and approving the contract just click on the unstakeall button and all the staked tokens will be transferred back to your wallet.

加入帝王流动池的步骤

流动池质押最少需要1个皇帝代币。加入流动池，打开小狐狸钱包浏览器

<https://emperorsclub-poolstake.netlify.app>

按照以下步骤操作。

步骤1-点击(CONNECT)

打开代币质押Dapp网址，点击连接按钮并接受连接。

步骤2-点击(APPROVE)

连接到Dapp后，需要首先授权智能合约转移代币。

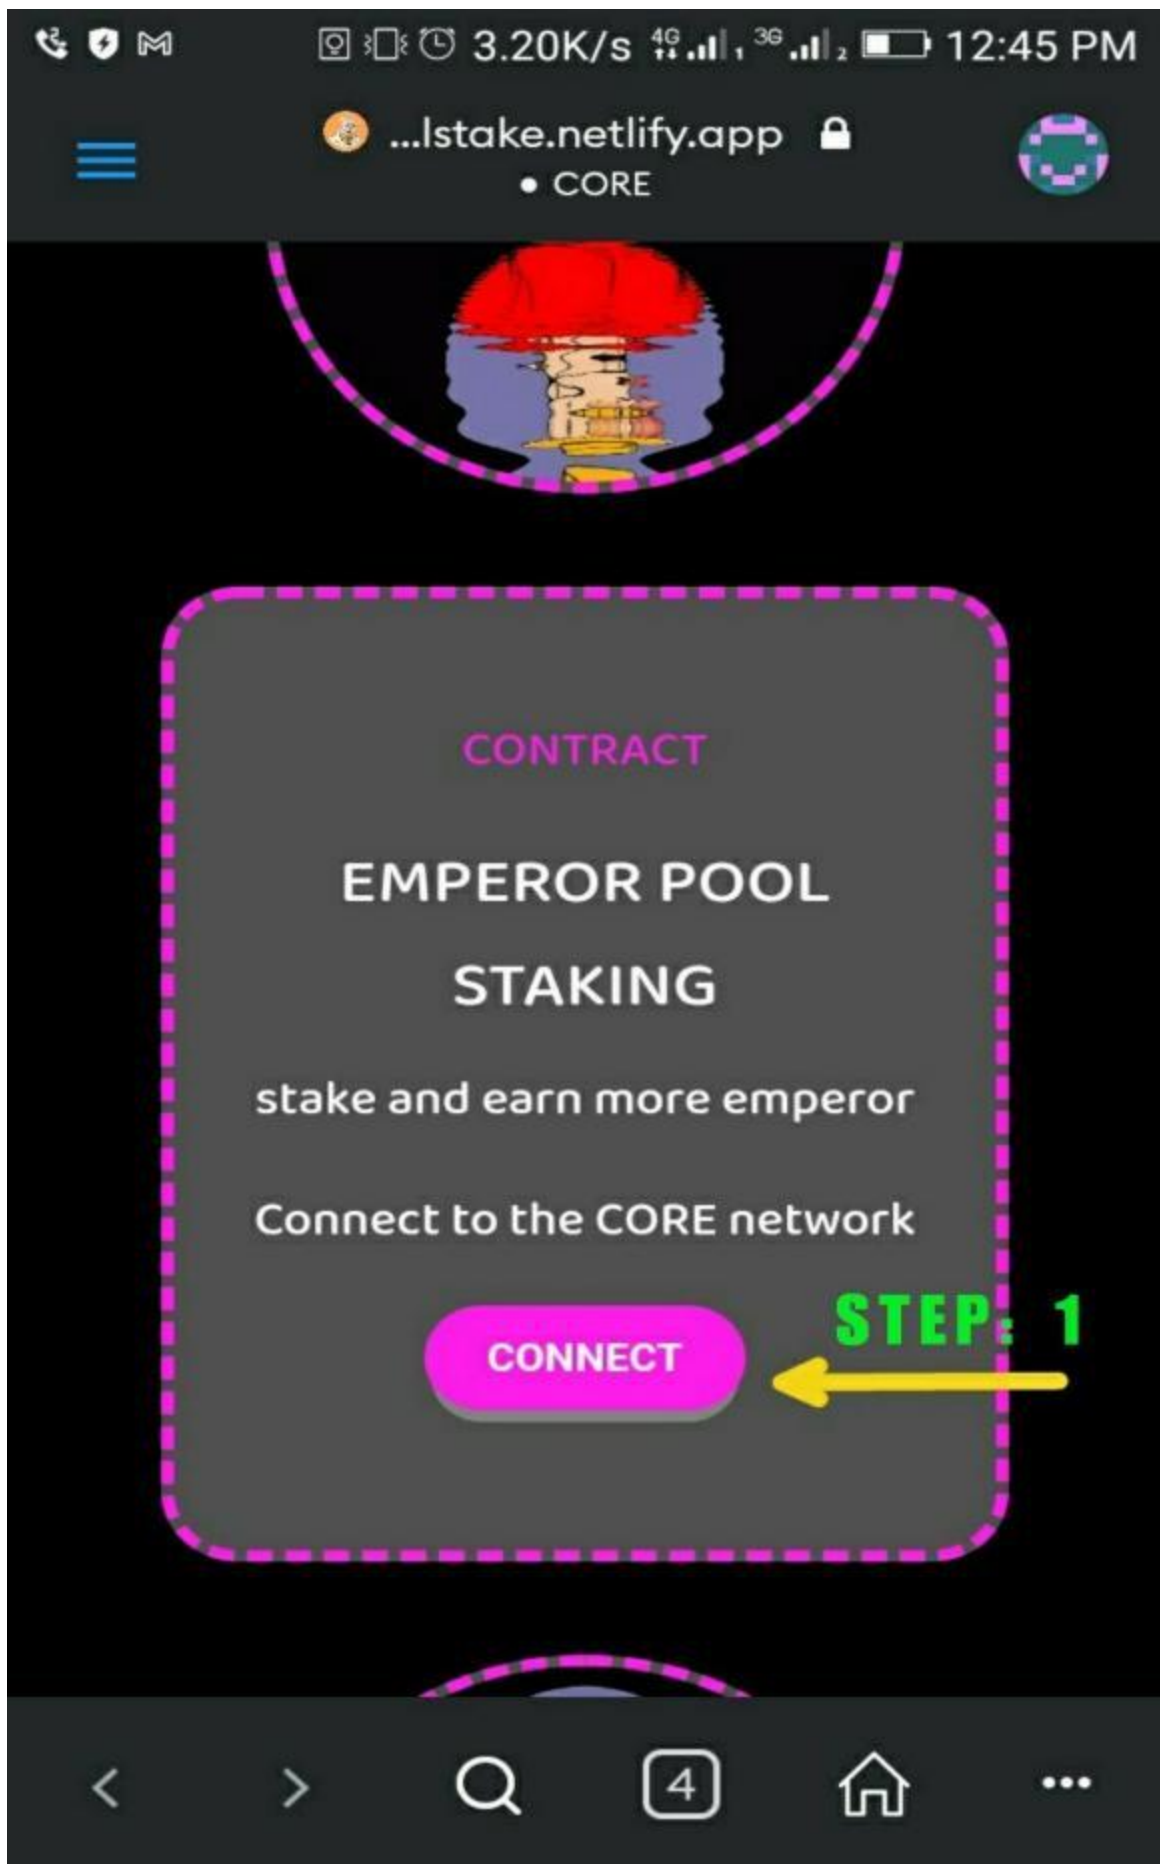

步骤3-输入(质押代币数量)

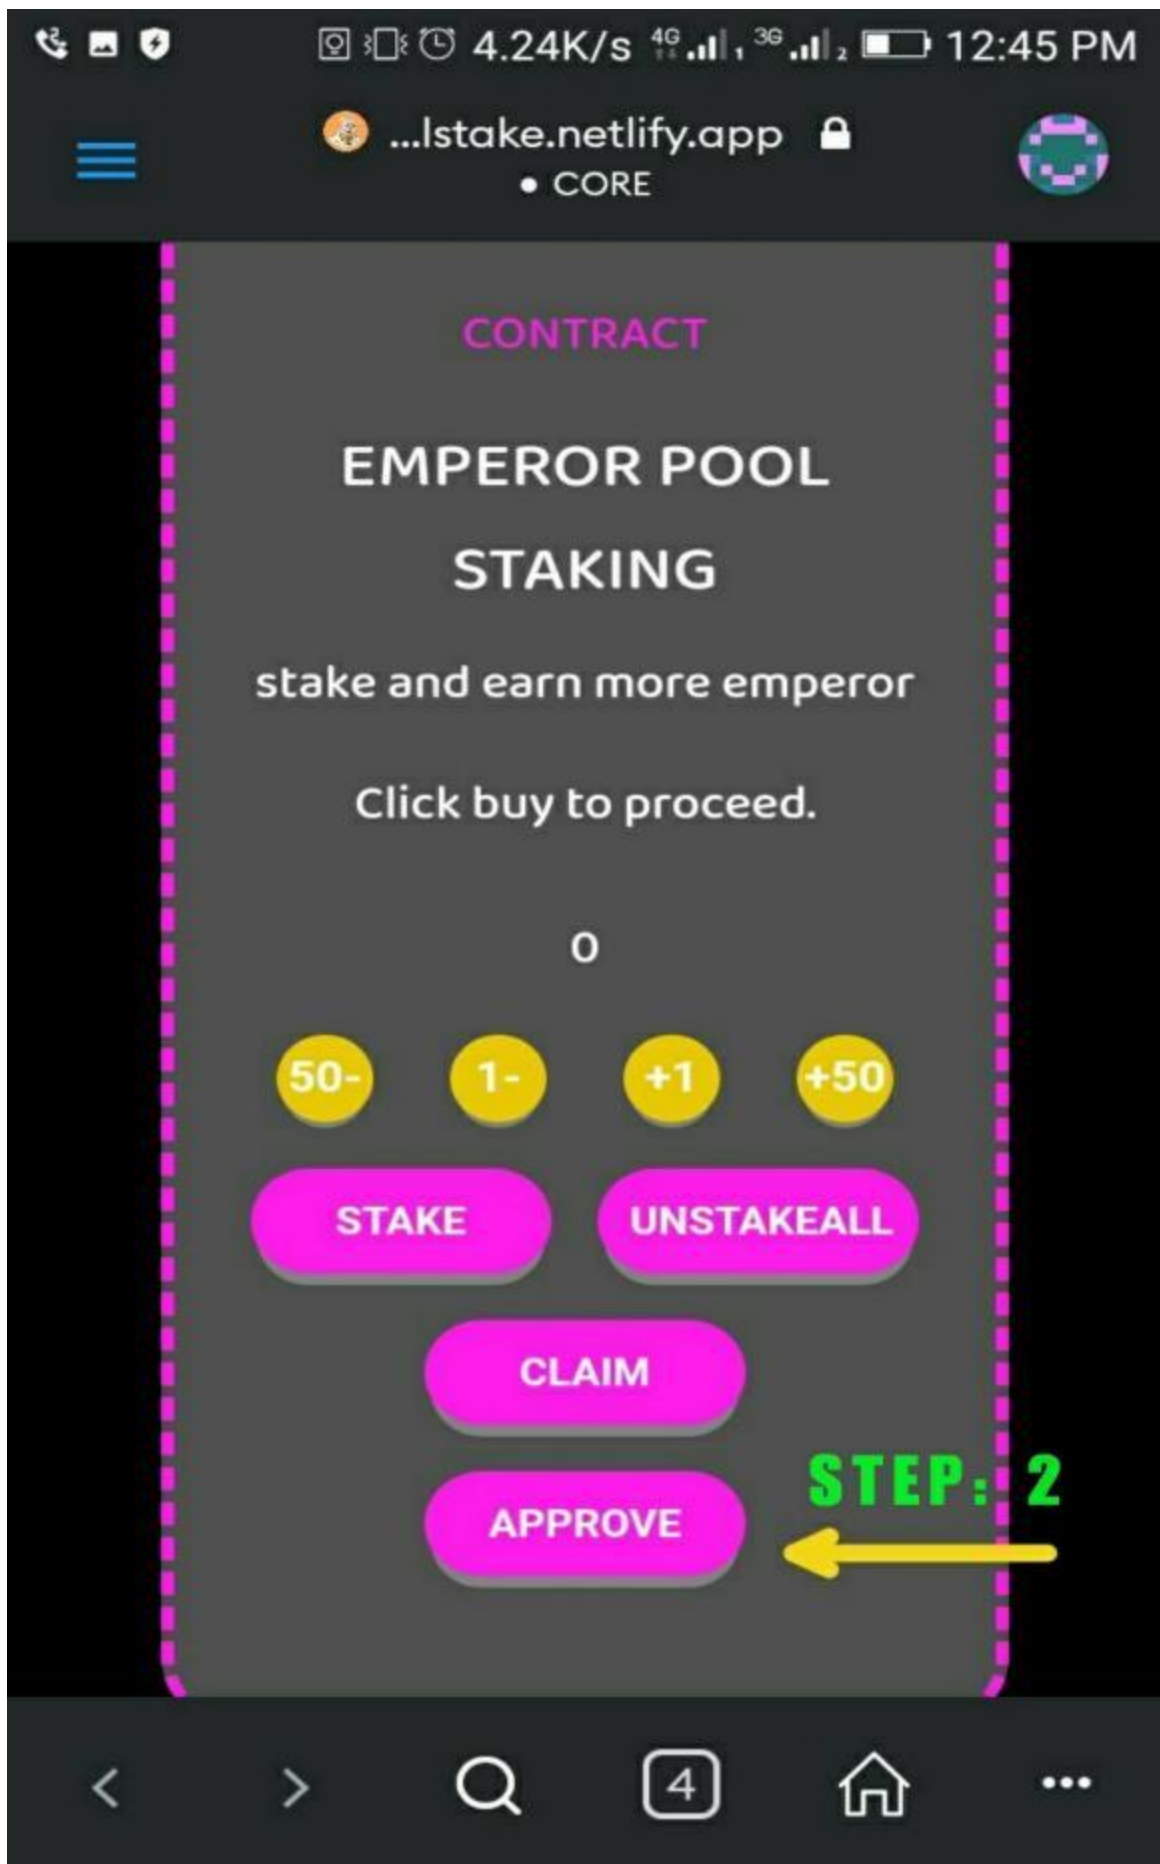

输入您要质押的皇帝代币的数量。

步骤4-点击(STAKE)

输入代币数量后，单击质押按钮，相应数量将从您的钱包中提取到智能合约中。只要代币仍被锁定，您就有资格领取奖励。可以随时增加代币数量，来增加领取的收益率。

要收回已质押的代币，在连接并批准合同后，只需单击“取消质押”按钮，所有已质押的代币将被转移回您的钱包地址。
